DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to *Hypermedia (i.e. list, link, and menu pages, displaying on a browser)* , classified in class 715, subclass 501.1.
 - II. Claims 21-33, drawn to *Multi-computer Data Transferring – Master/Slave Computer Controlling*, classified in class 709, subclass 208.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, and the subcombination has separate utility because:

Group I deals substantially with hyperlinks and device buttons, list/link/menu pages, displaying on a browser and/or applied on a page (hypermedia).

Group II deals substantially with accessing network devices for activating controllable functions within said devices (master/slave computer controlling).

Art Unit: 2176

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
